Projects

Bakery Website

- A bakery website serves to showcase the products, services, and brand of a bakery. It typically includes various sections such as home, about, menu, product,review ,contact and blogs. Here's a structured outline to build such a website using HTML, CSS, and JavaScript.
The successful outcome of a bakery website built using HTML, CSS, and JavaScript can be measured through various metrics and qualitative improvements that enhance the bakery's online presence, customer interaction, and overall business growth.

Netflix-clone

- Developed a Netflix clone using React.js, implementing a dynamic and responsive user interface. Utilized TMDB API to fetch and display movie data, including categories, details, and trailers. Implemented user authentication with Firebase and managed state using Redux. Focused on replicating Netflix's UI/UX design, enhancing performance and ensuring smooth navigation. Deployed the application on Firebase for real-time updates and scalability.

Ecommerce Website

- Developed a full-stack e-commerce platform using the MERN stack (MongoDB, Express.js, React, Node.js). Implemented user authentication, product listing, shopping cart, and checkout functionality. Created RESTful APIs and managed data with MongoDB, ensuring efficient and secure operations. Utilized Redux for state management and integrated Stripe for payment processing. Enhanced user experience with a responsive design and optimized performance, successfully .
